# Fund Summary

## Investment Objective(s)

The Fund's investment objective is long-term growth of capital.

## Fees and Expenses of the Fund

This table describes the fees and expenses that are incurred, directly or indirectly, when a variable product owner buys, holds, or redeems interest in an insurance company separate account that invests in the Series I shares or Series II shares of the Fund but does not represent the effect of any fees or other expenses assessed in connection with your variable product, and if it did, expenses would be higher.

### SALES CHARGES (fees paid directly from your investment)

Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of original purchase price or redemption proceeds, whichever is less)	None	None

### ANNUAL FEES AND EXPENSES (expenses that you pay each year as a percentage of the value of your investment)

	SERIES I	SERIES II
Management Fees	0.71%	0.71%
Distribution and/or Service (12b-1) Fees	None	0.25
Other Expenses	0.19	0.19

**Market Risk.** The market values of the Fund's investments, and therefore the value of the Fund's shares, will go up and down, sometimes rapidly or unpredictably. Market risk may affect a single issuer, industry or section of the economy, or it may affect the market as a whole. The value of the Fund's investments may go up or down due to general market conditions that are not specifically related to the particular issuer, such as real or perceived adverse economic conditions, changes in the general outlook for revenues or corporate earnings, changes in interest or currency rates, regional or global instability, natural or environmental disasters, widespread disease or other public health issues, war, military conflict, acts of terrorism, economic crisis or adverse investor sentiment generally. During a general downturn in the financial markets, multiple asset classes may decline in value. When markets perform well, there can be no assurance that specific investments held by the Fund will rise in value.

**Investing in Stocks Risk.** The value of the Fund's portfolio may be affected by changes in the stock markets. Stock markets may experience significant short-term volatility and may fall or rise sharply at times. Adverse events in any part of the equity or fixed-income markets may have unexpected negative effects on other market segments. Different stock markets may behave differently from each other and U.S. stock markets may move in the opposite direction from one or more foreign stock markets.

The prices of individual stocks generally do not all move in the same direction at the same time. However, individual stock prices tend to go up and down more dramatically than those of certain other types of investments, such as bonds. A variety of factors can negatively affect the price of a particular company's stock. These factors may include, but are not limited to: poor earnings reports, a loss of customers, litigation against the company, general unfavorable performance of the company's sector or industry, or changes in government regulations affecting the company or its industry. To the extent that securities of a particular type are emphasized (for example foreign stocks, stocks of small- or mid-cap companies, growth or value stocks, or stocks of companies in a particular industry), fund share values may fluctuate more in response to events affecting the market for those types of securities.

**Preferred Securities Risk.** Preferred securities are subject to issuer-specific and market risks applicable generally to equity securities. Preferred securities also may be subordinated to bonds or other debt instruments, subjecting them to a greater risk of non-payment, may be less liquid than many other securities, such as common stocks, and generally offer no voting rights with respect to the issuer.

**Depositor Receipts Risk.** Investing in depositary receipts involves the same risks as direct investments in foreign securities. In addition, the underlying issuers of certain depositary receipts are under no obligation to distribute shareholder communications or pass through any voting rights with respect to the deposited securities to the holders of such receipts. The Fund may therefore receive less timely information or have less control than if it invested directly in the foreign issuer.

**Foreign Securities Risk.** The Fund's foreign investments may be adversely affected by political and social instability, changes in economic or taxation policies, difficulty in enforcing obligations, decreased liquidity or increased volatility. Foreign investments also involve the risk of the possible

countries in the region. Certain economies in the region may be adversely affected by increased competition, high inflation rates, undeveloped financial services sectors, currency fluctuations or restrictions, political and social instability and increased economic volatility.

The Fund's Japanese investments may be adversely affected by protectionist trade policies, slow economic activity worldwide, dependence on exports and international trade, increasing competition from Asia's other low-cost emerging economies, political and social instability, regional and global conflicts and natural disasters, as well as by commodity markets fluctuations related to Japan's limited natural resource supply. The Japanese economy also faces several other concerns, including a financial system with large levels of nonperforming loans, over-leveraged corporate balance sheets, extensive cross-ownership by major corporations, a changing corporate governance structure, and large government deficits.

Investments in companies located or operating in Greater China (normally considered to be the geographical area that includes mainland China, Hong Kong, Macau and Taiwan) involve risks and considerations not typically associated with investments in the U.S. and other Western nations, such as greater government control over the economy; political, legal and regulatory uncertainty; nationalization, expropriation, or confiscation of property; lack of willingness or ability of the Chinese government to support the economies and markets of the Greater China region; lack of publicly available information and difficulty in obtaining information necessary for investigations into and/or litigation against Chinese companies, as well as in obtaining and/or enforcing judgments; limited legal remedies for shareholders; alteration or discontinuation of economic reforms; military conflicts and the risk of war, either internal or with other countries; public health emergencies resulting in market closures, travel restrictions, quarantines or other interventions; inflation, currency fluctuations and fluctuations in inflation and interest rates that may have negative effects on the economy and securities markets of Greater China; and Greater China's dependency on the economies of other Asian countries, many of which are developing countries. Events in any one country within Greater China may impact the other countries in the region or Greater China as a whole. Export growth continues to be a major driver of China's rapid economic growth. As a result, a reduction in spending on Chinese products and services, the institution of additional tariffs, sanctions, capital controls, embargoes, trade wars, or other trade barriers (or the threat thereof thereof t 17.96040 17.9 are

and/or e30-

recommend the Fund over another investment. Ask your salesperson or financial adviser or visit your financial intermediary's website for more information.

---

## **Investment Objective(s), Strategies, Risks and Portfolio Holdings**

### **Objective(s) and Strategies**

The Fund's investment objective is long-term growth of capital. The Fund's investment objective may be changed by the Board of Trustees (the Board) without shareholder approval.

The Fund invests, under normal circumstances, at least 80% of its net assets, plus borrowings for investment purposes, in equity securities, and in derivatives and other instruments that have economic characteristics similar to such securities. The Fund invests primarily in equity securities (including depositary receipts) of foreign issuers. The principal types of equity securities in which the Fund invests are common and preferred stock. The Fund's common stock investments also include China A-shares (shares of companies based in mainland China that trade on the Shanghai Stock Exchange and the Shenzhen Stock Exchange). A depositary receipt is generally issued by a bank or financial institution and represents an ownership interest in the common stock or other equity securities of a foreign company.

Under normal circumstances, the Fund will provide exposure to investments that are economically tied to at least three different countries outside of the U.S. The Fund may also invest up to 1.25 times the amount of

the economies and markets of the Greater China region; lack of publicly available information and difficulty in obtaining information necessary for investigations into and/or litigation against Chinese companies, as well as in obtaining and/or enforcing judgments; limited legal remedies for shareholders; alteration or discontinuation of economic reforms; military conflicts and the risk of war, either internal or with other countries; public health emergencies resulting in market closures, travel restrictions, quarantines or other interventions; inflation, currency fluctuations and fluctuations in inflation and interest rates that may have negative effects on the economy and securities markets of Greater China; and Greater China's dependency on the economies of other Asian countries, many of which are developing countries. Events in any one country within Greater China may impact the other countries in the region or Greater China as a whole. For example, changes to their political and economic relationships with mainland China could adversely impact the Fund's investments in Taiwan and Hong Kong. Additionally, any difficulties of the PCAOB to inspect audit work papers and practices of PCAOB-registered accounting firms in China with respect to their audit work of U.S. reporting companies may impose significant additional risks associated with investments in China.

Investments in Chinese companies may be made through a special structure known as a variable interest entity ("VIE") that is designed to

liquid than those of more established companies. These securities may have returns that vary, sometimes significantly, from the overall securities market.

**Sector Focus Risk.** The Fund may from time to time have a significant amount of its assets invested in one market sector or group of related industries. The prices of stocks of issuers in a sector or group of industries may go up and down in response to changes in economic conditions, government regulations, availability of basic resources or supplies, or other events that affect that industry or sector more than others. In this event, the Fund's performance will depend to a greater extent on the overall condition of the sector or group of industries and there is increased risk that the Fund will lose significant value if conditions adversely affect that sector or group of industries. Information about the Fund's investment in a market sector or group of industries is available in its annual and semi-annual reports to shareholders and in its reports on Form N-PORT filed with the SEC.

**Environmental, Social and Governance (ESG) Considerations**

**Risk.** The ESG considerations that may be assessed as part of the investment process to implement the Fund's investment strategy in pursuit of its investment objective may vary across types of investments and issuers eligible for investment, and not every ESG factor may be identified or evaluated for every investment, and not every investment or issuer may be evaluated for ESG considerations. The Fund's portfolio will not be solely based on ESG considerations, and therefore the issuers in which the Fund invests may not be considered ESG-focused issuers. The incorporation of ESG factors may affect the Fund's exposure to certain issuers or industries and may not work as intended. The Fund may underperform other funds that do not assess an issuer's ESG factors as part of the investment process

**Risk**gei(in-4(ider(y as ov td, )36-m o-cous iri(OTC) be) Tw9.978 0 0 9.940.91070263.1266554 Tmdeedvarma ma9(The Fua

value of the instrument being hedged or the relevant market or market segment, in which case the Fund may not realize the intended benefits. There is also the risk that during adverse market conditions, an instrument which would usually operate as a hedge provides no hedging benefits at all. The Fund's use of derivatives may be limited by the requirements for taxation of the Fund as a regulated investment company.

**Management Risk.** The Fund is actively managed and depends heavily on the Adviser's judgment about markets, interest rates or the attractiveness, relative values, liquidity, or potential appreciation of particular investments made for the Fund's portfolio. The Fund could experience losses if these judgments prove to be incorrect. There can be no guarantee that the Adviser's investment techniques or investment decisions will produce the desired results. Additionally, legislative, regulatory, or tax developments may affect the investments or investment strategies available to the Adviser in connection with managing the Fund, which may also adversely affect the ability of the Fund to achieve its investment objective.

### Portfolio Holdings

A description of Fund policies and procedures with respect to the disclosure of Fund portfolio holdings is available in the SAI, which is available at [www.invesco.com/us](http://www.invesco.com/us).

---

## Fund Management

### The Adviser(s)

Invesco serves as the Fund's investment adviser. The Adviser manages the investment operations of the Fund as well as other investment portfolios that encompass a broad range of investment objectives, and has agreed to perform or arrange for the performance of the Fund's day-to-day management. The Adviser is located at 1331 Spring Street, N.W., Suite 2500, Atlanta, Georgia 30309. The Adviser, as successor in interest to multiple investment advisers, has been an investment adviser since 1976.

*Sub-Ad i er.* Invesco has entered into one or more Sub-Advisory Agreements with certain affiliates to serve as sub-advisers to the Fund (the Sub-Advisers). Invesco may appoint the Sub-Advisers from time to time to provide discretionary investment management services, investment advice, and/or order execution services to the Fund. The Sub-Advisers and the Sub-Advisory Agreements are described in the SAI.

### Exclusion of Adviser from Commodity Pool Operator Definition

With respect to the Fund, the Adviser has claimed an exclusion from the definition of "commodity pool operator" (CPO) under the Commodity Exchange Act (CEA) and the rules of the Commodity Futures Trading Commission (CFTC) and, therefore, is not subject to CFTC registration or regulation as a CPO. In addition, the Adviser is relying upon a related exclusion from the definition of "commodity trading advisor" (CTA) under the CEA and the rules of the CFTC with respect to the Fund.

The terms of the CPO exclusion require the Fund, among other things, to adhere to certain limits on its investments in "commodity interests." Commodity interests include commodity futures, commodity options and swaps, which in turn include non-deliverable forwards. The Fund is permitted to invest in these instruments as further described in the Fund's SAI. However, the Fund is not intended as a vehicle for trading in the commodity futures, commodity options or swaps markets. The CFTC has neither reviewed nor approved the Adviser's reliance on these exclusions, or the Fund, its investment strategies or this prospectus.

### Adviser Compensation

During the fiscal year ended December 31, 2023, the Adviser received compensation of 0.71% of the Fund's average daily net assets, after fee waiver and/or expense reimbursement, if any.

A discussion regarding the basis for the Board's approval of the investment advisory agreement and investment sub-advisory agreements of

the Fund is available in the Fund's most recent annual or semi-annual report to shareholders.

### Portfolio Managers

The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

- Brent Bates, CFA, Portfolio Manager, who has been responsible for the Fund since 2013 and has been associated with Invesco and/or its affiliates since 1996.
- Mark Jason, CFA, Portfolio Manager, who has been responsible for the Fund since 2011 and has been associated with Invesco and/or its affiliates since 2001.
- Mark McDonnell, CFA, Portfolio Manager, who has been responsible for the Fund since 2023 and has been associated with Invesco and/or its affiliates since 2003.
- Richard Nield, CFA, Portfolio Manager, who has been responsible for the Fund since 2013 and has been associated with Invesco and/or its affiliates since 2000.
- Michael Shaman, Portfolio Manager, who has been responsible for the Fund since 2023, and has been associated with Invesco and/or its affiliates since 2012.

More information on the portfolio managers may be found at [www.invesco.com/us](http://www.invesco.com/us). The website is not part of this prospectus.

The Fund's SAI provides additional information about the portfolio managers' investments in the Fund, a description of the compensation structure and information regarding other accounts managed.

---

## Other Information

### Purchase and Redemption of Shares

The Fund ordinarily effects orders to purchase and redeem shares at the Fund's next computed net asset value (NAV) after it receives an order. Insurance companies participating in the Fund serve as the Fund's designee for receiving orders of separate accounts that invest in the Fund. The Fund may postpone the right of redemption only under unusual circumstances, as allowed by the SEC, such as when the New York Stock Exchange (NYSE) restricts or suspends trading.

Although the Fund generally intends to pay redemption proceeds solely in cash, the Fund reserves the right to determine, in its sole discretion, whether to satisfy redemption requests by making payment in securities or other property (known as a redemption in kind). Redemptions in kind may result in transaction costs and/or market fluctuations associated with liquidating or holding the securities, respectively.

Shares of the Fund are offered in connection with mixed and shared funding, i.e., to separate accounts of affiliated and unaffiliated insurance companies funding variable products. The Fund currently offers shares only to insurance company separate accounts and funds of funds. In the future, the Fund may offer them to pension and retirement plans that qualify for special federal income tax treatment. Due to differences in tax treatment and other considerations, the interests of Fund shareholders, including variable product owners and plan participants investing in the Fund (whether directly or indirectly through fund of funds), may conflict.

Mixed and shared funding may present certain conflicts of interest. For example, violation of the federal tax laws by one insurance company separate account investing directly or indirectly in a fund could cause variable products funded through another insurance company separate account to lose their tax-deferred status, unless remedial actions were taken. The Board will monitor for the existence of any material conflicts and determine what action, if any, should be taken. The Fund's NAV could decrease if it had to sell investment securities to pay redemption proceeds to a separate account (or plan) withdrawing because of a conflict.

### **Redemptions by Large Shareholders**

At times, the Fund may experience adverse effects when certain large shareholders redeem large amounts of shares of the Fund. Large redemptions may cause the Fund to sell portfolio securities at times when it would not otherwise do so. In addition, these transactions may also accelerate the realization of taxable income to shareholders (if applicable) if such sales of investments resulted in gains and may also increase transaction costs and/or increase in the Fund's expense ratio. When experiencing a redemption by a large shareholder, the Fund may delay payment of the redemption request up to seven days to provide the investment manager with time to determine if the Fund can redeem the request-in-kind or to consider other alternatives to lessen the harm to remaining shareholders. Under certain circumstances, however, the Fund may be unable to delay a redemption request, which could result in the automatic processing of a large redemption that is detrimental to the Fund and its remaining shareholders.

### **Excessive Short-Term Trading Activity Disclosure**

The Fund's investment programs are designed to serve long-term investors and are not designed to accommodate excessive short-term trading activity in violation of the Fund's policies and procedures described below.

Excessive short-term trading activity in the Fund's shares (i.e., purchases of Fund shares followed shortly thereafter by redemptions of such shares, or vice versa) may hurt the long-term performance of the Fund by requiring it to maintain an excessive amount of cash or to liquidate portfolio holdings at a disadvantageous time, thus interfering with the efficient management of the Fund by causing it to incur increased brokerage and administrative costs. Where excessive short-term trading activity seeks to take advantage of arbitrage opportunities from stale prices for portfolio securities, the value of Fund shares held by long-term investors may be diluted. The Board has adopted policies and procedures designed to discourage excessive short-term trading of Fund shares. The Fund may alter its policies and procedures at any time without giving prior notice to Fund shareholders if Invesco believes the change would be in the best interests of long-term investors.

before the close of the trading market or issuer specific events occurred after the security ceased trading or because of the passage of time between the close of the market on which the security trades and the close of the NYSE and when the Fund calculates its NAV. Issuer specific events may cause the last market quotation to be unreliable. Such events may include a merger or insolvency, events that affect a geographical area or an industry segment, such as political events or natural disasters, or market events, such as a significant movement in the U.S. market. Where the Adviser determines that the closing price of the security is stale or unreliable, the Adviser will value the security at its fair value.

A fair value price is an estimated price that requires consideration of all appropriate factors, including indications of fair value available from pricing services. Fair value pricing involves judgment and a fund that uses fair value methodologies may value securities higher or lower than another fund using market quotations or its own fair value methodologies to price the same securities. Investors who purchase or redeem Fund shares on days when the Fund is holding fair-valued securities may receive a greater or lesser number of shares, or higher or lower redemption proceeds, than they would have received if the Fund had not fair-valued the security or had used a different methodology.

The Board has designated the Adviser to perform the daily determination of fair value prices in accordance with Board approved policies and related procedures, subject to the Board's oversight. Fair value pricing methods and pricing services can change from time to time.

The intended effect of applying fair value pricing is to compute a NAV that accurately reflects the value of the Fund's portfolio at the time that the NAV is calculated. An additional intended effect is to discourage those seeking to take advantage of arbitrage opportunities resulting from "stale" prices and to mitigate the dilutive impact of any such arbitrage. However, the application of fair value pricing cannot eliminate the possibility that arbitrage opportunities will exist.

Specific types of securities are valued as follows:

*Senior Secured Floating Rate Loan and Senior Secured Floating Rate Debt Securities*. Senior secured floating rate loans and senior secured floating rate debt securities are fair valued using evaluated quotes provided by an independent pricing service. Evaluated quotes provided by the pricing service may reflect appropriate factors such as market quotes, ratings, tranche type, industry, company performance, spread, individual trading characteristics, institution-size trading in similar groups of securities and other market data.

*Domestic Exchange Traded Equity Securities*. Market quotations are generally available and reliable for domestic exchange traded equity securities. If market quotations are not available or are unreliable, the Adviser will value the security at fair value in good faith using the valuation policy approved by the Board and related procedures.

*Foreign Securities*. If market quotations are available and reliable for foreign exchange traded equity securities, the securities will be valued at the market quotations. Because trading hours for certain foreign securities end before the close of the NYSE, closing market quotations may become unreliable. If between the time trading ends on a particular security and the close of the customary trading session on the NYSE events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. If an issuer specific event has occurred that the Adviser determines, in its judgment, is likely to have affected the closing price of a foreign security, it will price the security at fair value. The Adviser also relies

The Fund generally determines the net asset value of its shares on each day the NYSE is open for trading (a business day) as of approximately 4:00 p.m. Eastern Time (the customary close of regular trading) or earlier in the case of a scheduled early close. In the event of an unscheduled early close of the NYSE, the Fund generally still will determine the net asset value of its shares as of 4:00 p.m. Eastern Time on that business day. Portfolio securities traded on the NYSE would be valued at their closing prices unless the Adviser determines that a "fair value" adjustment is appropriate due to

fees and/or commissions it charges. The prospectus for your variable product may also contain additional information about these payments.

## Financial Highlights

The financial highlights show the Fund's financial history for the past five fiscal years or, if shorter, the period of operations of the Fund or any of its share classes. The financial highlights table is intended to help you understand the Fund's financial performance. Certain information reflects financial results for a single Fund share.

The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions).

This information has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the Fund's annual report, which is available upon request.

(a) Calculated using average shares outstanding.

(b) Includes adjustments in accordance with accounting principles generally accepted in the United States of America and as such, the net asset value for financial reporting purposes and the returns based upon those net asset values may differ from the net asset value and returns for shareholder transactions. Total returns are not annualized for periods less than one year, if applicable, and do not reflect charges assessed in connection with a variable product, which if included would reduce total returns.

(c) Portfolio turnover is calculated at the fund level and is not annualized for periods less than one year, if applicable.

---

## Hypothetical Investment and Expense Information

In connection with the final settlement reached between Invesco and certain of its affiliates with certain regulators, including the New York Attorney General's Office, the SEC and the Colorado Attorney General's Office (the settlement) arising out of certain market timing and unfair pricing allegations made against Invesco and certain of its affiliates, Invesco and certain of its affiliates agreed, among other things, to disclose certain hypothetical information regarding investment and expense information to Fund shareholders. The chart below is intended to reflect the annual and cumulative impact of the Fund's expenses, including investment advisory fees and other Fund costs, on the Fund's returns over a 10-year period. The example reflects the following:

- You invest \$10,000 in the Fund and hold it for the entire 10-year period;
- Your investment has a 5% return before expenses each year; and
- The Fund's current annual expense ratio includes any applicable contractual fee waiver or expense reimbursement for the period committed.

There is no assurance that the annual expense ratio will be the expense ratio for the Fund's classes for any of the years shown. The chart does not take into account any fees or other expenses assessed in connection with your variable product; if it did, the expenses shown would be higher, while the ending balance shown would be lower. This is only a hypothetical presentation made to illustrate what expenses and returns would be under

---

## Obtaining Additional Information

More information may be obtained free of charge upon request. The SAI, a current version of which is on file with the SEC, contains more details about the Fund and is incorporated by reference into this prospectus (is legally a part of this prospectus). Annual and semi-annual reports to shareholders contain additional information about the Fund's investments. The Fund's annual report also discusses the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. The Fund also files its complete schedule of portfolio holdings with the SEC for the 1st and 3rd quarters of each fiscal year as an exhibit to its reports on Form N-PORT. The Fund's most recent portfolio holdings, as filed on Form N-PORT, will also be made available to insurance companies issuing variable products that invest in the Fund.

If you have questions about an Invesco Fund, or you wish to obtain a free copy of the Fund's current SAI, annual or semi-annual reports, or Form N-PORT, please contact the insurance company that issued your variable product, or you may contact us.
