or recession, changes in interest or currency rates, lack of liquidity in the bond markets or adverse investion seartive exhaustions will not typically have the same impact on all types of securities. The market price of a security may adscontalitions the separticular sector of the securities market or a particular issuer. Your fund shares at any point in time may be worth vesteth, even after taking into account the reinvestment of fund dividends and distributions.

The market prices of securities may fluctuate significantly when interest rates change. When interest rates change was continued to securities, and therefore the value of your investment in the fundages elastly. Generally, the longer the maturity or duffixed introforme security, the greater the impact of a rise in interest rates on the security market price. However, calculations of duffixed barrate that interest rates and may not reliably predict a security sprice sensitivity to changes in interest rates. Recenfly, tithrerey have been in movements. As such, fixed income securities markets may experience heightened levels of interest rateries late the security of the security o

announced that, with limited exceptions, no new LIBOR-based contracts should be entered into after 2021naActionesulty deigulators establishment of alternative reference rates to LIBOR in most major currencies. In March 2022, the U.S. feede legislation tented establish a process for replacing LIBOR in certain existing contracts that do not already provide for three discerptace practities of replacement benchmark rate as described in the legislation. Generally speaking, for contracts that do not isomains alestobled pin the legislation, a benchmark replacement recommended by the Federal Reserve Board will effectively automatically replace the US benchmark in the contract after June 30, 2023. The recommended benchmark replacement will be based on the Grant Reserve Bank of New York, including certain spread adjustments and benchmark replacement of Various financial industry groups have been planning for the transition away from LIBOR, but there remains the financial markets generally. The transition away friour ease of related transaction away from LIBOR and may adversely affect the fund's performance. The transition such the feach the value of certain LIBOR-based investments held by the fund or reduce the effectiveness of related transactions actions using feach the descriptions are the fund. Since the useful BORs as a benchmark could also deteriorate during the transition period, effects could occur at any time.

Credit risk.

If the fund buys securities denominated in a foreign currency, receives income in foreign currencies, or but in the same as the fund of th

The risks of foreign investments are heightened when investing in issuers in emerging market countries. Executed don't acknowledge to contribute that are less developed and are less stable than those of more developed countries. They typically have fewer medical and economite vestopsedes than more countries, and thus they may be less able to control or mitigate the effects of a pandemic or a natural disparticul linky sensibility to market movements because their market prices tend to reflect speculative expectations. Low trading value her linearly in extreme price volatility. Investors should be able to tolerate sudden, sometimes substantial, fluctuative string trained has value energing markets. Emerging market countries may have policies that restrict investment by foreigners or that prevent for the day wing stress for money at will.

Risks related to Russia's invasion of UkraRussia•s military invasion of Ukraine in February 2022, the resulting responses by the Un and other countries, and the potential for wider conflict have increased volatility and uncertainty in the diad we is by affects and regional and global economies. The United States and other countries have imposed broad-ranging economic sertations on Russia Russian individuals, banking entities and corporations as a response to its invasion of Ukraine. The Uniterdress teason as a response to its invasion of Ukraine. imposed economic sanctions on Belarus and may impose sanctions on other countries that support Russiaessailitation in version. The well as any other economic consequences related to the invasion, such as additional sanctions, boycotts or onsumer preferences or cyberattacks on governments, companies or individuals, may further decrease the value ausstilianus dispublicant R securities of issuers in other countries that are subject to economic sanctions related to the invasion. Trontol en asstexpolsant et the Russian investments or investments in countries affected by the invasion, the fundes ability to price, things self-the invasion investments or investments in countries affected by the invasion, the fundes ability to price, things in the invasion investments or investments in countries affected by the invasion, the fundes ability to price, things in the invasion investments in countries affected by the invasion, the fundes ability to price, things in the invasion investments in countries affected by the invasion investment in the invasion investment in the invasion investment in the invasion investment investment investment in the invasion investment may be impaired. The fund may determine that certain affected securities have zero value. In addition, and exposare that the fu counterparties in Russia or in countries affected abaid hecoroll megatively impact the fundes portfolio. The dexativity and Russiaes military actions and the repercussions of such actions (including any retaliatory actions or countermeasubrest to be study to the study sanctions) are impossible to predict, but could continue to result in significant market disruptions, in clatting in the mail water and may continue to negatively affect global supply chains (including global food supplies), inflation and globally relative. Telegration and globally relative of the continue to negatively affect global supply chains (including global food supplies), inflation and globally relative. could significantly impact the fund sperformance and the value of an investment in the fund, even beyon the fund sperformance and the value of an investment in the fund, even beyon the fund sperformance and the value of an investment in the fund. Russian issuers or issuers in other countries directly affected by the invasion.

Sovereign debt riskSovereign government and supranational debt involve many of the risks of foreign and emerging markets invest as the risk of debt moratorium, repudiation or renegotiation, and the fund may be .9(ul)6014 Tc 2(ent[pnn (n)-.6(c)-7.4(l)h.5(v)4.8(a

Prepayment or call risMany fixed income securities give the issuer the option to repay or call the security prior to its maturity date. I exercise this right when interest rates fall. Accordingly, if the fund holds a fixed income security subject to subject the proceed in value that other fixed income securities generally experience when interest rates that the proceeds at the current yields, which would be lower than the precipitation and the proceeds at the current yields, which would be lower than the precipitation and the precipitation and the premium paid in the event of prepayment. Precipitation to reduce the yield to maturity and the favor through the precipitation and the premium paid in the event of prepayment. Precipitation to reduce the yield to maturity and the favor through the premium paid in the event of prepayment.

Extension riskWhen interest rates rise, repayments of fixed income securities, particularly asset- and mortgage-backechsæreurities, reslowly than anticipated, extending the effective duration of these fixed income securities at below markætustærætærætæræd c prices to decline more than they would have declined due to the rise in interest rates alone. This may caruæettheærundre share p volatile.

Risk of investing in fewer issue to the extent the fund invests its assets in a small number of issuers, or in issuers in related business are subject to related operating risks, the fund will be more susceptible to negative events affecting those issuers.

Investment in loans risknvestments in loans are generally subject to the same risks as investments in other types of debt obligation among others, credit risk, interest rate risk, prepayment risk, and extension risk. In addition, in many caselsed exists are social early with below-investment grade securities. This means loans are often subject to significant credit risks, incibility of nature at early social early will be adversely affected by changes in market or economic conditions and may default or enterflower flower than the increase in the event of an economic downturn or a substantial increase in interest rates (which will indiverse the social before the service). Transactions in loans may settle on a delayed basis. As a result, the proceeds from the sale of able to make the funder of payment to senior loans, they are subject to the additional risk that the cash flow of the borrower and two poorty deservation of payment to meet scheduled payments after giving effect to the senior secured obligations of the desired payments field the risk field to the senior secured obligations of the desired payments after giving effect to the senior secured obligations of the desired payments after giving effect to the senior secured obligations of the desired payments after giving effect to the senior secured obligations of the desired payments after giving effect to the senior secured obligations of the desired payments after giving effect to the senior secured obligations of the desired payments after giving effect to the senior secured obligations of the desired payments after giving effect to the senior secured obligations of the desired payments after giving effect to the senior secured obligations of the desired payments after giving effect to the senior secured obligations of the desired payments after giving effect to the senior secured obligations.
